

SHARON ORRMAN-ROSSITER

Sharon Orrman attended St Georges Rd Primary School, Wilmot Rd Primary School, and Shepparton Girls' School, which during her time there then became Wanganui Park Secondary College.

At Shepparton Girls' School Sharon developed a real interest in French, the Humanities and Sciences and remembers many young passionate teachers who encouraged students to be more individual and creative. After entering an International Science Scholarship program, Sharon knew she wanted to be a research scientist.

Sharon studied English, Pure and Applied Mathematics, Physics and chemistry in Year 12 and was Dux of Wanganui Park Secondary College in 1976.

Sharon completed a Bachelor of Science at The University of Melbourne, graduating in 1981 and worked for some time in the pharmaceutical industry. In the 1980s Sharon travelled to the U.K. where she did her Masters at Selford University and later a Doctorate in Philosophy at Victoria University in Manchester. During her time in science research, Sharon studied the effects of serotonin on the human body. She returned to Australia in 1991.

In the early 1990's Sharon became interested in career coaching and followed this alongside her professional work. After completing market research and analysis Sharon gave up a secure professional career to develop a business called 'Orros Careers', which later became 'Clarity Now'. Clarity Now is a very successful business with clients across Australia and overseas and provides individually tailored programs for clients to enable them to achieve their best in their careers and life.

Alongside her professional career Sharon has found the time and commitment to compete in triathlons at the elite level. Debuting in 2004 and progressing to international competition by 2006 when she represented Australia in the World Championships in Lausanne, Switzerland. Then in 2007 she again represented Australia at the World Championships in Lorient, France.
